

MX Samplers, water quality sampling stations

Features

In use since 1966

Weatherproof: seal (replaceable) rests on an internal 1 pc gasket retainer

Low maintenance/ graffiti removal made easy due to finish.

Fusion bonded epoxy coated (optional) eliminating repainting costs

Will not easily chip, pit nor corrode

Variety of colors available

Inside Shelf with bottle stops

Plumbing streamlined and compatible with District systems

Construction:

Heavy duty construction eliminating replacement costs

Welds prepped and dressed

100% Stainless Steel housing and plumbing pkg.

Safety:

Safety heights of approx 3' 10" (may reduce general liability)

Field personnel don't squat nor (may bend while sampling reduce workers' compensation liability)

Doors are easy to secure after sampling is complete

Units can stand abuse and still maintain their ascetically pleasing appearance

Security:

Our featured lock is a Mortise Cabinet Slab Lock.

Our lock system is the lock choice of most districts.

No additional keys will be necessary when using our MX Samplers (standard design).

We will never have access to your district's permanent keys

Newer hasp design available. Modifications welcome
